"The Buzz Bomb targets gamefish and bait at any depth, and is one of the most effective lures I have ever used!"

BuzzBomb

Mark Pendlington

*Professional Angler West Coast Sporting Journal
Tv Show on major networks across North America*

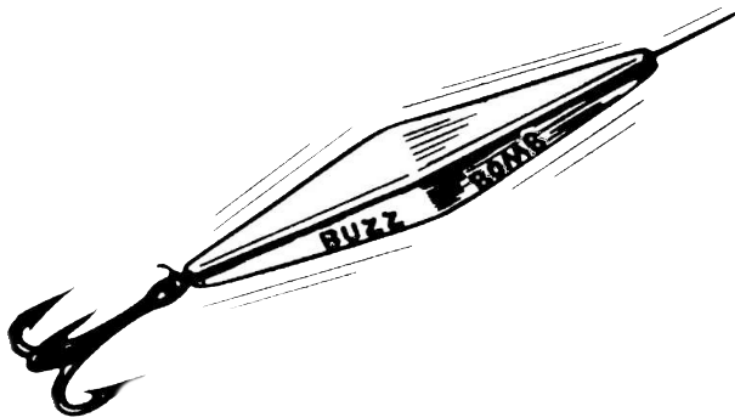

BUZZ-BOMB®

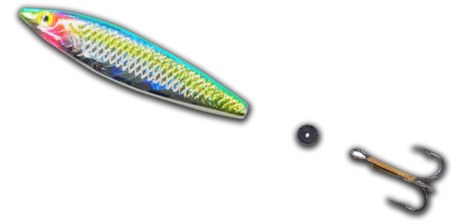

Buzz Bomb invented sonic fishing, and also the use of bright flashy colours to emulate wounded bait fish with a jig type lure. The Buzz Bomb is sold worldwide and is renowned for its ability to hook Salmon and other prized species while casting and jigging.

There is no need to troll to catch a trophy fish with Buzz Bomb on the line. Classic colours like the Hot Pink, Glow, Blue Pearl, Pink Pearl, Green Pearl have been used FOR DECADES with huge success to catch desired species. The Buzz Bomb Holographic series was another first for the industry, and the new UV Flashbomb's are proving ever more potent in both fresh and salt water environments.

To use a Buzz Bomb correctly, it is critical to rig it correctly – there is an arrow on the lure body. Also short 2 to 3 foot jigs, or pulls backward on the cast or troll, are critical for the lure to have enough slack line to rotate on the descent. The rotation replicates a wounded bait fish, and the erratic flashing from our engineered colours will force a fish instinctively to strike it. Fishing just below or beside bait balls or "haystacks" offers near guaranteed strikes, which is why for over 50 years Buzz Bomb has gained a loyal and fanatical following.

ZZINGER®

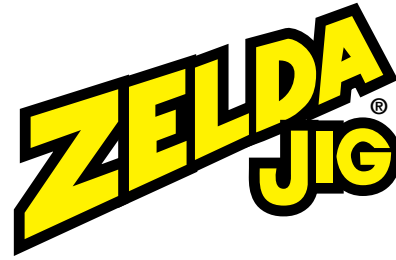

The legendary Zzinger is a main stay in the tackle box for catching salmon, as well as for bottom fishing at depth. Bought in the dozens by guides and commercial fishermen, the Zzinger has a unique market position and set of attributes that offer the most efficient fishing. Used in a similar fashion to the Buzz Bomb and Spinnow (jigged or cast), the Zzinger's shape creates the same iconic sonic rotation as the Buzz Bomb. However, the Zzinger tends to move more rapidly through the water column both on descent and as it is being actioned. This speed is keenly appreciated in faster moving water, and when target areas – the bait balls, shoals, or "holes" – are passing by quickly. Absolute success catching fish has kept the Zzinger relevant for over 50 years. It is a true favorite of pros, fishing lodges, and anglers of all age. An alternative to trolling, and most recently a lure of choice for motorless fishing like kayak fishing or paddle board (SUP) fishing. When wondering what to buy for busy water - take no risks and buy the Zzinger. The 0.5oz 1.5oz are perfect for fresh water environments and depths to 75 feet, while the 2.5oz, and 4.5 oz sizes are good for deeper. Match your colors to the current or typical bait or prey fish, and within a minute or 2 fish are on the line.

Spinnow is a triple sonic lure that takes the best of the classic Zzinger and Buzz Bomb attributes, but integrates a hard wire axel through its centre allowing the lure to rotate more quickly on the descent. The wire axel creates a unique sonic vibration and makes the downward descent of the lure slower. Thus the Spinnow can rest in front of fish longer making even the most docile fish strike! Spinnow is sold for species like mackerel on the East coast; pike, walleye and lake trout in the fresh water of the mid west, and we have seen significant growth in sales for ice fishing or lake fishing (for trout, burbot, pike and walleye). Recent TV shows have presented the Spinnow's success with various pelagic species found in Mexico and Hawaii like tuna, pompano, rooster fish and mahi mahi. The large variations in size of Spinnow offer the angler numerous execution and environmental options with the 18g and 40g perfect for casting or jigging more shallow areas, while the 70g, 150g and 270g lures are great for deeper fishing and variable currents.

Zelda Jig is the classic Norwegian style jig with easy connectivity across all the shapes and sizes. Made with 2 stationary metal loops on each end, the Zelda Jig can take on any sizes fish without damage. For over 50 years the Zelda has been a main stay for deep water and bottom fishing. Salmon, Yellow eye, Rock fish, Black Bass, cod, and Ling Cod all consistently bite the Zelda and its vast array of bait fish colours. The one lure from Buzzbomb Tackle that does not rotate downward, the Zelda Jig falls in an erratic "zig zag" mimicking a wounded bait fish that has been stunned. Bigger jigs with the Zelda Jig are reasonable - 4 to 6 foot - as well as the more economical jigs according to the local conditions and fishing attributes.
